Subject: E - Plans and RMP data base access
Date: Thursday, April 18, 2013 1:30:04 PM

Seems to me that we need to find a way that all PRB managers and all OSCs can gain access to E-Plans for Tier II information and the RMP database so if a responder needs access after normal business hours including weekends, someone can help them out be it the phone duty officer or a manager. We can't continue to rely on getting this information from only 2 people in the entire region. With the pending furloughs, this may prove to be a bigger problem.

Talking with Steve Mason this morning he stated that the OSCs were given an opportunity through Jim Staves to sign up for E-Plans access years ago. Steve said he wasn't sure who took Jim up on the offer. I believe Misty and Steve have access to it. As for the RMP database, Bob and Liz have access. I know that I am still having trouble accessing the RMP database and Bob is trying to help me figure out what the issue is.

Thought I would offer this up now as something for us to consider and discuss as part of the lessons learned.
